DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 3-5, 7-14 and 34 are allowed.
2. The following is an examiner's statement of reasons for allowance: Applicant has amended independent claim 1 to require the application of a pressure of about 400 to about 850 psi to form the high density portions of the multi-ply core component.

The closest prior art, Stofko [US4007312], teaches a method of bonding lignocellulosic material in the manufacture of laminated wood products. The method comprises applying a pressure that does not exceed the pressure at which the lignocellulosic material is crushed. Stofko does not disclose using a pressure above 300 psi. One of ordinary skill in the art would not find it obvious to apply a pressure within the claimed pressure range in view of Stofko because of Stofko's teaching away from using pressures that will crush the lignocellulosic material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
